Class 2: Reference Document

Here's some code for you to use on your own. You can't have it on the computer, you need to type it all in yourself! You'll thank me later.

File: class2.html

```html
<!DOCTYPE html>
<html>
<head>
    <title>My Great Class2 Page</title>
    <link href="style.css" type="text/css"
rel="stylesheet">
</head>
<body>
    <h1 id="welcome">Class 2 Work!</h1>
    <p>We are going to make some great styles.</p>

    <p class="huge">This text should be huge.</p>

    <p>I am now going to take over this document... And add
some great stuff.</p>

    <img src="http://placecage.com/400/400" class="framed">

    <p class="warning">This is a warning!</p>
    <p class="success">You have successfully saved your
document!</p>

</body>
</html>
```

This next block of code goes into a SEPARATE file called class2.css. Make sure it is in the same directory as class2.html

File: class2.css

```
body {
    font-family: Georgia, serif;
}

p {
    color: red;
}

#welcome {
    font-family: Helvetica;
    color: blue;
}

.huge {
    font-size: 300%;
}

.framed {
    border-width: 20px;
    border-style: solid;
    border-color: gray;
}

/*
    Some stuff to try, see if you can make these styles
work in your document
*/
.warning {
    color: red;
    font-weight: bold;
    border: 1px solid red;
    padding: 15px;
}

.success {
    color: green;
    font-weight: bold;
    border: 1px solid green;
    padding: 15px;
}
```
